

Chris Sanchez

Driven developer excited to apply my technical knowledge and collaborative skills in building elegant solutions to complex, modern problems. I love digging into both the backend architecture of an application as well as the frontend user interface and experience, joining the two into a complete experience.

Portland, Oregon

EXPERIENCE

Propopen, Portland, OR — Full Stack Developer – Ruby/Rails, React

March 2020 - Present

- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements
- Performed code reviews on pull requests to ensure code meets production level standards of readability, scalability, and maintainability
- Merged 100+ pull requests for features such as contact management tools, Excel integration, CRM, account management, and the signup/onboarding flow
- Built CRUD functionality with GraphQL/Apollo, Ruby, React, and PostgreSQL
- Built front-end application features using React.js with scale and reuse-ability

Whole Foods, Tualitan, OR — Team Trainer

AUGUST 2017 - NOVEMBER 2018

- Successfully integrated new hires onto department teams by teaching company core values and specific department procedures
- Created training documents for future new hires and Team Trainers

EDUCATION

Epicodeus, Portland — Web Development Certificate

OCTOBER 2019 - MARCH 2020

- Completed full-time, 27-week program in web and open-source development
- Built over 60 applications with JavaScript, Ruby, React, PostgreSQL
- Developed interpersonal and communication skills through pairing and group projects

University of Oregon, Eugene — BA English Literature

SEPTEMBER 2012 - JUNE 2016

- Collaborated with others to proofread and publish works of writing in local or University journals such as Oregon Voice and Unbound.

PROJECTS

[Shelf Search](#) — React.js

Shelf Search is a webapp based around finding information about literary events in your area, poetry, and ebook/PDF availability. Features text-to-speech audio playback and readable ebooks. ([live demo](#))

[Appliance Hub](#) — Ruby/Rails

Full CRUD product database. Built with Ruby/Rails, CSS3, HTML5, Javascript, and PostgreSQL. Features authorization for admins and users. ([live demo](#))
